

**AMENDMENTS TO THE CLAIMS**

1. **(Cancelled)**
2. **(Currently Amended)** A stabilizing formulation for an immunoglobulin G composition consisting of a sugar alcohol, glycine and a non-ionic detergent, ~~in order to be suitable for the stabilisation of an immunoglobulin G composition in liquid form and in lyophilised form.~~
3. **(Previously Presented)** The formulation according to claim 2, wherein the sugar alcohol is mannitol.
4. **(Previously Presented)** The formulation according to claim 3, wherein the concentration of mannitol is between 30 g/l and 50 g/l.
5. **(Previously Presented)** The formulation according to claim 2, characterized in that the concentration of glycine is between 7 g/l and 10 g/l.
6. **(Cancelled)**
7. **(Currently Amended)** An immunoglobulin G composition in liquid form, ~~comprising~~ consisting of immunoglobulins G, water and the stabilising formulation according to claim 2.
8. **(Currently Amended)** An immunoglobulin G composition in lyophilised form, ~~comprising~~ consisting of immunoglobulins G and the stabilising formulation according to claim 2.
9. **(Previously Presented)** The immunoglobulin G composition according to claim 7, wherein the composition includes an amount of polymers less than 0.3% after a 6 months storage period at room temperature.

10. **(Previously Presented)** The immunoglobulin G composition according to claim 8, wherein the composition includes an amount of polymers less than 0.3% after a 12 months storage period at room temperature of for 6 months at 40°C.

11. **(Previously Presented)** The immunoglobulin G composition according to claim 2, wherein the composition includes an amount of dimers less than 7% after a 24 months storage period at 4°C.

12.-17. **(Cancelled)**
